Colour Studio

To make colouring your shoes or bag as optimal as possible, we have drawn up some guidelines:

- We can only guarantee colouring of our own Rainbow Club brand.
- Please always send a fabric sample of at least 5 x 5 cm. If you do not have a sample, you can send the complete garment (dress, scarf etc.). If the sample is smaller, colouring is at your own risk.
- If the fabric sample has a changing colour or a pattern with multiple colours always indicate the desired colour direction/ correct colour by marking the fabric side.
- Before returning your coloured shoes, we treat them with a suitable impregnation spray. Nevertheless, the colour is not water-resistant and not suitable for wearing in high humidity and rain.
- When colouring styles with bows, buttons, glitters, etc., some colour difference may possibly occur.
- You can have already coloured shoes and bags re-coloured in dark colours, such as dark green, blue and black. Should you consider this, we recommend not to impregnate the shoes or to impregnate them lightly. Please state this clearly above.
- When colouring already ‚impregnated' shoes and bags, there is a risk that the paint will not cover properly.
- Please make sure the insides and bottoms of the shoes are cleaned, i.e. without grass or mud.

I have read the information and hereby authorise ShoeStories' Colour Studio to colour the sent items.

For agreement,
